

**TOWNSHIP OF LANARK HIGHLANDS  
TENDER #PR 2024-10  
OBTAIN THE SERVICES TO SUPPLY AND INSTALL A NEW SECTION OF ROOF FOR  
THE MIDDLEVILLE MUSEUM**

***Addendum No. 1***

*(dated September 18, 2024)*

This addendum is provided to clarify the project scope regarding **ice guards**. The Request for Tender Document states “Provide and install ice and water shield 6' up, ice guard” on page 15, under Project Scope. Ice and water shield 6” up is required as noted. Ice guards (double bar) are only required for an eight-foot section on the southern-most portion of the roof, in the area marked with an orange arrow in the image below. Ice guards in this area will protect the heat-pump at ground-level. No other ice guard is required at this time, however, when the sheeting is replaced, blocking (lumber reinforcement) should be installed along the northwest edge of the roof section (the area marked with an orange circle in the image below). Costing for the supply and installation of the ice guards and blocking should be identified separately within the quote provided.
